House In Hands

Property. In Your Hands.

Nigeria’s connected property technology ecosystem — discovery, verification, agreements, payments, management and intelligence in one platform.

Housing is fragmented.

01

Hard to find trusted homes

People search across many channels, middlemen and incomplete listings.

02

Complicated rental journeys

Applications, agreements, payments and records live in different places.

03

Heavy landlord admin

Collections, tenants, maintenance and documentation stay manual and opaque.

04

Weak coordination

Managers, developers and investors struggle to act on clear property data.

03 · THE SOLUTION

One connected property ecosystem.

House In Hands brings people, properties, payments, services and property intelligence into one digital platform — so Nigerians can find, agree, pay for and manage homes with clearer costs and digital records.

01

People

Landlords, tenants, students, managers

02

Properties

Homes, land & commercial spaces

03

Payments

Rent, dues & utilities

04

Services

Maintenance & operations

05

Intelligence

Records & property insight

From signup to full access.

1. Sign up on House In Hands
2. Choose profile: landlord, tenant, student or estate manager (multi-profile supported)
3. Complete KYC — NIN + selfie; CAC for estate managers; student ID where required
4. Use the services you need — marketplace, management, payments, maintenance and more

05 · PRODUCT

Nine services. One lifecycle.

Every service can stand alone. A landlord can manage already-occupied homes without listing a new house. Users only adopt what they need.

01	Property marketplace
02	Property management
03	Tenant & occupancy
04	Rent & payments
05	Maintenance & services
06	Property-as-a-Service
07	Data & intelligence
08	Developer & investor tools
09	Digital property records

Control without the chaos.

Trust first

KYC, verified listings and clearer counterparties before money moves.

End-to-end journey

Discover !’ apply !’ agree !’ pay !’ manage !’ maintain !’ exit — in one system.

Modular by design

Use only what you need. Occupied portfolios and marketplace can live side by side.

Built for Nigeria

Free registration, free listings, local payments, multilingual AI assistance and real market realities.

Where we’re going.

OUR MISSION

To make housing transactions and property management simpler, more transparent and more accessible by connecting people, properties, payments, services and data.

OUR VISION

To become Africa’s most trusted and intelligent property technology ecosystem.

Principles that shape the product.

1

Trust

Confidence in who is involved, what is offered and how deals are handled.

2

Transparency

Clear prices, terms, processes, records and responsibilities.

3

Innovation

Automate friction, connect fragmented steps, improve experiences.

4

Ownership

More control over property, money, records and decisions.

5

People First

Built for real Nigerian realities — not abstract ‘users to optimise’.

09 · LET’S BUILD

Take property into your hands.

House In Hands is live and expanding across marketplace, management, payments, KYC, AI assistance and digital records — with free registration and free property listings.
