What this deck covers

01 Problem & market context

02 Solution & connected ecosystem

03 Product depth & live capabilities

04 User journey & service pillars

05 DNICE sector fit

06 Deployment readiness

07 Business model

08 Differentiation

09 Partnership & capital ask

10 Mission, values & contact

Nigeria’s housing economy needs an operating system.

01 **Fragmented discovery**

Homes are found across informal networks, agents and unverified listings.

02 **Broken trust layer**

Identity, property claims and payment proof are hard to verify at scale.

03 **Ops still manual**

Rent collection, leases, maintenance and exits run on chats and spreadsheets.

04 **Digital demand is rising**

Landlords, tenants and managers want one connected journey — not more apps.

Renting and managing property is still painful.

Tenants

Opaque fees, weak documentation, hard exits, unreliable maintenance follow-through.

Landlords

Occupancy tracking, collections, tenant onboarding and disputes remain labour-heavy.

Managers

Portfolio coordination across payments, repairs and records lacks a single source of truth.

Market

Low digital trust slows formalisation of an enormous real-estate economy.

House In Hands — one connected property ecosystem.

We digitise the full property lifecycle: find or list homes, verify people and properties, agree digitally, pay rent/utilities, manage occupancy, raise issues, keep records — and use AI to assist without replacing human judgment on legal matters.

01 People	Landlords, tenants, students, estate managers, investors
02 Properties	Vacant marketplace homes + already-occupied managed assets
03 Payments	Rent, dues, utilities, wallet, receipts and audits
04 Services	Maintenance, building issues, exits, support workflows
05 Intelligence	AI review, assistants, records and operational insight

Deployment-ready platform capabilities

House In Hands is not a concept deck — core product surfaces are live and expanding toward scale.

Marketplace

Verified public listings, SEO discovery, apply flows

KYC & trust

In-house AI + admin review for identity/profile verification

Leases & docs

Digital agreements, e-sign paths, document retention

Payments

Paystack rent/utilities, receipts, wallet rails

Occupied onboard

Invite current tenants into managed properties

My Home hub

Tenant view of costs, docs, bills, messages, exits

Exit notices

AI screen + human legal/ops review + refund workflow

Building issues

AI Property Manager triage with landlord escalation

AI assistants

Public Ask AI + portal assistant (multi-language)

Admin & RBAC

Ops console for KYC, listings, fraud, content, emails

Comms

In-app messages, email, push notifications

Brand & CMS

Website content, waitlist, outreach tooling

A clear path from signup to operations

01

Register

Create an account — free to join.

02

Profile

Landlord, tenant, student or estate manager (multi-profile).

03

Verify

KYC with NIN/selfie; CAC for managers; student ID where needed.

04

Activate

List, manage, pay, message, maintain — pick the services you need.

05

Operate

Collections, issues, exits and records stay in one auditable system.

Nine pillars across the property lifecycle

Modular by design: every service can stand alone. Landlords can manage already-occupied assets without listing; others adopt only what they need.

01

Property marketplace

Discover, list and explore verified homes.

02

Property management

Organise operations, statuses and records.

03

Tenant & occupancy

Applications, leases, invites, occupancy.

04

Rent & payments

Rent, dues, utilities, receipts, wallet.

05

Maintenance & services

Requests, repairs, inspections, support.

06

Property-as-a-Service

Operational support for stakeholders.

07

Data & intelligence

Property information and market insight.

08

Developer & investor

Inventory visibility and project promotion.

09

Digital records

Property, tenancy, payment and maintenance history.

Aligned to NITDA–NACCIMA focus sectors

Primary categories for this application — with clear product evidence already shipping.

01

FinTech & Digital Commerce

Rent/utility payments, wallet, receipts, formal digital commerce for housing transactions.

02

Infrastructure & Cloud Platforms

A multi-sided operating platform for discovery, tenancy ops, records and stakeholder workflows.

03

AI-Native Systems

KYC AI, listing review, building-issue triage, portal/public assistants (multi-language).

04

Cybersecurity, Privacy & Digital Trust

Identity verification, verified listings, RBAC admin, audit trails and accountable messaging.

Eligible and ready for Deal Room engagement

- **Registered Nigerian business**
  House In Hands Limited — CAC documentation available for TWG review.

- **MVP / live product**
  Public site + authenticated portal with marketplace, KYC, payments, leases, AI tools.

- **Focus-sector technology**
  FinTech/commerce, cloud infrastructure, AI-native workflows, digital trust.

- **Physical attendance**
  Team available for DNICE 2026 Builders Festival, Abuja — 10–12 November 2026.

- **Pilot-ready B2B use cases**
  Estate managers, landlords, developers and corporate housing programmes.

- **Trust & compliance path**
  KYC, verification gates, audit logs; Digital Trust Mark pathway interest.

Land free. Monetise trust, transactions and ops.

Growth starts with free registration and free property listings — then expands into high-intent monetisation as users transact and operate on-platform.

Transaction fees

Agreement fees, payment rails and successful housing transactions.

Managed services

Assisted / fully managed packages for landlords and estate operators.

SaaS / portfolio ops

Advanced management, analytics and multi-unit tooling over time.

Value-added services

Maintenance coordination, utilities, premium verification & support.

B2B / enterprise

Developer inventory, corporate housing, off-take style partnerships.

Data products (later)

Anonymised market intelligence for serious operators and investors.

Not another listings site.

Full lifecycle OS	Discovery through payments, occupancy, maintenance and exit — not ads alone.
Occupied + vacant	Manage real portfolios already rented; invite tenants into digital workflows.
Trust stack	KYC AI, listing verification, admin escalation, auditability.
AI with guardrails	Assists ops and messaging; legal decisions stay human-reviewed where required.
Nigeria-first UX	Local payments, multilingual AI replies, free entry to reduce adoption friction.
B2B expandable	Estate managers, developers and corporate buyers can plug into the same rails.

What we seek from DNICE 2026

We are applying to scale deployment — not to prototype. Our objectives align with Deal Room outcomes: capital, contracts and industrial partnerships.

Domestic capital

Engage top-tier Nigerian investors and financiers seeking home-grown infrastructure for housing & commerce.

B2B off-take & pilots

Pilot with NACCIMA corporate members — estate operators, developers, employers and property-linked manufacturers.

Distribution & exhibition

Showcase at the NITDA–NACCIMA pavilion to policymakers, corporates and partners.

Trust acceleration

Pursue Digital Trust Mark pathway for compliant growth and cross-border readiness.

Why we build

MISSION

Make housing transactions and property management simpler, more transparent and more accessible by connecting people, properties, payments, services and data.

VISION

Become Africa’s most trusted and intelligent property technology ecosystem.

01

Trust

02

Transparency

03

Innovation

04

Ownership

05

People First
